

Technical data sheet

GM24A-MP-TP

MP27BUS

Communicative damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 8 m²
- Nominal torque 40 Nm
- Nominal voltage AC/DC 24 V
- Control Modulating DC (0)2...10 V Variable
- Position feedback DC 2...10 V
 Variable
- · With connecting terminals
- Communication via Belimo MP-Bus
- Conversion of sensor signals

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	4 W
	Power consumption in rest position	1.6 W
	Power consumption for wire sizing	7 VA
	Connection supply / control	Terminals 4 mm ² (cable Ø 410 mm, 4-wire)
Functional data	Torque motor	Min. 40 Nm
	Torque variable	25%, 50%, 75% reduced
	Positioning signal Y	DC 010 V
	Positioning signal Y note	Input impedance 100 kΩ
	Control signal Y variable	Open-close
		3-point (AC only)
		Modulating (DC 032 V)
	Operating range Y	DC 210 V
	Operating range Y variable	Start point DC 0.530 V
		End point DC 2.532 V
	Position feedback U	DC 210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	Start point DC 0.58 V
		End point DC 2.510 V
	Position accuracy	±5%
	Direction of motion motor	Selectable with switch 0 / 1
	Direction of motion note	Y = 0 V: At switch position 0 (ccw rotation) / 1
		(cw rotation)
	Direction of motion variable	Electronically reversible
	Manual override	Gear disengagement with push-button, can be locked
	Angle of rotation	Max. 95°
	Angle of rotation note	can be limited on both sides with adjustable
		mechanical end stops
	Running time motor	150 s / 90°
	Motor running time variable	75290 s
	Adaption setting range	manual
	Adaption setting range variable	No action
		Adaption when switched on
		Adaption after pushing the gear disengagement button
	Override control	MAX (maximum position) = 100%
		MIN (minimum position) = 0%
		ZS (intermediate position, AC only) = 50%
	Override control variable	MAX = (MIN + 32%)100%
		MIN = 0%(MAX - 32%)
		ZS = MINMAX
	Cound now or lovel motor	45 dB(A)
	Sound power level motor	+3 dD(//)

Accessories

Product features	
Home position	The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%). The actuator then moves into the position defined by the positioning signal.
	$ \begin{array}{c} $
Adaption and synchronisation	An adaption can be triggered manually by pressing the "Adaption" button or with the PC-Tool. Both mechanical end stops are detected during the adaption (entire setting range). Automatic synchronisation after pressing the gearbox disengagement button is configured. The synchronisation is in the home position (0%). The actuator then moves into the position defined by the positioning signal. A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Output signal DC 0...10 V

(max.8)

A) more actuators and sensors (max.8) 1) Depending on the type 2) Resolution 1 Ohm

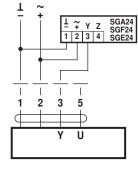

Functions with basic values (conventional mode)

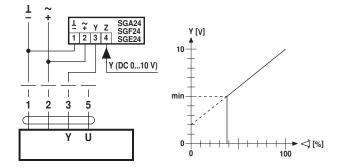

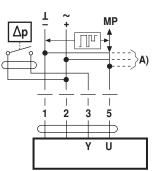

Minimum limit with positioner SG..

Remote control 0...100% with positioner SG..

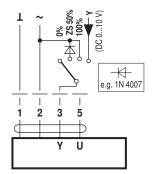

Connection of external switching contact

A) more actuators and sensors (max.8)

 Switching current 16 mA @ 24 V · Start point of the operating range must be parameterised on the MP actuator as ≥ 0.5 V

Override control with AC 24 V with rotary switch

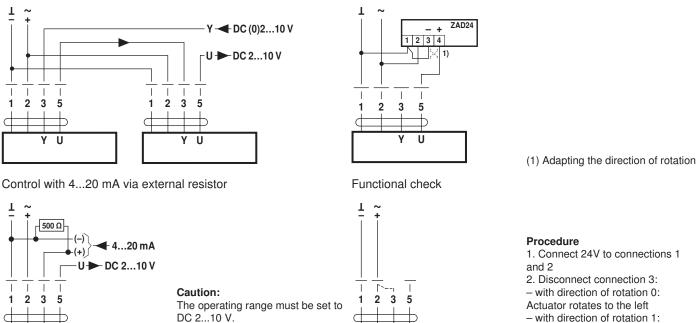

GM24A-MP-TP

Damper actuator, communicative, Modulating, AC/DC 24 V, 40 Nm

> 1) Caution: This function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

Actuator rotates to the right

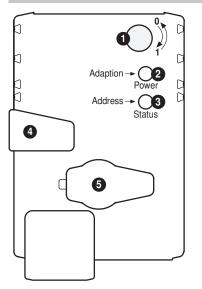

3. Short-circuit connections 2 and 3:

- Actuator runs in opposite direction

GM24A-MP-TP

Operating controls and indicators

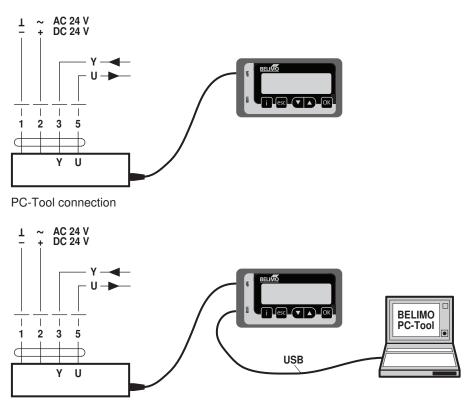

4	Direction of rota	tion owitch	
U	Switch over:	Direction of rotation changes	
2		LED display green	
	Off: On:	No power supply or malfunction In operation	
	Press button:	Triggers angle of rotation adaptation, followed by standard mode	
3	Push-button and	I LED display yellow	
	Off: Flickering: On: Flashing: Press button:	Standard mode MP communication active Adaptation or synchronising process active Request for addressing from MP master Confirmation of the addressing	
4	Gear disengager	nent button	
	Press button: Release button:	Gear disengages, motor stops, manual override possible Gear engages, synchronisation starts, followed by standard mode	
5	Service plug For connecting pa	arameterisation and service tools	
Ch	Check power supply connection		

2 Off and 3 On Possible wiring error in power supply

Service	
∧. No	 The actuator can be parameterised by PC-Tool and ZTH EU via the service socket.
