

Technical data sheet

NVC24A-MP-RE

MP27BUS

Communication-capable globe valve actuator for 2-way and 3-way globe valves

- Actuating force 1000 N
- Nominal voltage AC/DC 24 V
- Control modulating DC (0)
- 0.5 V...10 V, variableNominal stroke 20 mm
- Actuating time 35 s / 20 mm

RETRO

Technical data

| Electrical data | Nominal voltage | AC/DC 24 V |
|-----------------|--|--|
| | Nominal voltage frequency | 50/60 Hz |
| | Nominal voltage range | AC 19.228.8 V / DC 21.628.8 V |
| | Power consumption in operation | 3.5 W |
| | Power consumption in rest position | 1.5 W |
| | Power consumption for wire sizing | 5.5 VA |
| | Connection supply / control | Terminals 4 mm ² |
| | Parallel operation | Yes |
| Functional data | Actuating force | 1000 N |
| | Positioning signal Y | DC 010 V |
| | Positioning signal Y note | Input impedance 100 kΩ |
| | Operating range Y | DC 0.510 V |
| | Operating range Y variable | Start point DC 0.5 30 V |
| | | End point DC 2.5 32 V |
| | Position feedback U | DC 0.510 V |
| | Position feedback U note | max. 0.5 mA |
| | Position feedback U variable | Start point DC 0.5 8 V |
| | | End point DC 2.5 10 V |
| | Position accuracy | 5% absolute |
| | Manual override | Gear disengagement with push-button, can be |
| | | locked |
| | Nominal stroke | 20 mm |
| | Actuating time | 35 s / 20 mm |
| | Override control MAX (maximum position) | 100 % |
| | Override control MIN (minimum position) | 0 % |
| | Override control ZS (intermediate position, only AC) | 50 % |
| | Override control ZS variable | ZS = MIN MAX |
| | Sound power level motor max. | 60 dB (A) |
| | Position indication | Mechanical 5 20 mm stroke |
| Safety | Protection class IEC/EN | III Safety extra-low voltage |
| | Degree of protection IEC/EN | IP54 |
| | EMC | CE in accordance with 2004/108/EC |
| | Certification IEC/EN | Certified to: IEC/EN 60730-1 and IEC/EN 60730-2-14 |
| | Mode of operation | Type 1 |
| | Rated impulse voltage supply / control | 0.8 kV |
| | Control pollution degree | 3 |
| | Ambient temperature | 0°C 50°C |
| | Non-operating temperature | -40°C 80°C |
| | Ambient humidity | 95% r.h., non-condensing |
| | Maintenance | Maintenance-free |
| Maight | | |
| Weight | Weight approx. | 2.600 kg |

Globe valve actuator, communicative, modulating, AC/ DC 24 V, 1000 N, actuating time 35 s / 20 mm

| Safety notes | |
|------------------------------------|---|
| Ŵ | This actuator has been designed for application in stationary heating, ventilation and air-conditioning systems and is not allowed to be used outside the specified field of application, especially in aircraft or in any other airborne means of transport. Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation. The switch for changing the direction of motion/the closing point may be adjusted only by authorised personnel. The direction of stroke is critical, particularly in connection with frost protection circuits. The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user. The device contains electrical and electronic components and is not allowed to be disposed of as household refuse. All locally valid regulations and requirements must be observed. |
| | |
| Product features | |
| Principle of operation | The actuator is connected with a standard modulating signal of DC 0 10 V and travels to the position defined by the positioning signal. The measuring voltage U serves for the electrical display of the actuator position 0 100% and as slave control signal for other actuators. |
| Adjustable-parameter actuators | The factory settings cover the most common applications. Input and output signals and other parameters can be altered with the PC-Tool MFT-P or with the service tool ZTH-GEN. |
| Installation on third-party valves | The retrofit actuators for installation on a wide range of valves from various manufacturers are comprised of an actuator, bracket, universal valve neck adapter and universal valve stem adapter. Adapt the valve neck and valve stem to begin with, then attach the retrofit bracket to the valve neck adapter. Now fit the retrofit actuator into the bracket and connect it to the valve. Whilst taking the position of the valve closing point into account, secure the actuator to the bracket and then conduct the commissioning process. The valve neck adapter/actuator can be rotated through 360° on the valve neck, provided it is permitted by the size of the installed valve. |
| Installation on Belimo valves | Please use standard actuators from Belimo for installation on Belimo globe valves. The installation of retrofit actuators on Belimo globe valves is technically possible. |
| Manual override | Manual override with push-button possible - temporary, permanently. The gear is disengaged and the actuator decoupled for as long as the button is pressed / latched. The stroke can be adjusted by using a hexagon socket screw key (4 mm), which is inserted into the top of the actuator. The stroke spindle extends when the key is rotated clockwise. |
| High functional reliability | The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached. |
| Position indication | The stroke is indicated mechanically on the bracket with tabs. The stroke range adjusts itself automatically during operation. |
| Home position | Setting ex-works: Actuator spindle is retracted. |
| Direction of stroke switch | When actuated, the direction of stroke switch changes the running direction in normal operation. |
| Adaption of stroke range | The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a stroke adaption, which is when the operating range and position feedback adjust themselves to the mechanical stroke. Manual triggering of the adaption can be carried out by pressing the "Adaption" button or with the PC-Tool. The actuator then moves into the position defined by the positioning signal. |

Globe valve actuator, communicative, modulating, AC/ DC 24 V, 1000 N, actuating time 35 s / 20 mm

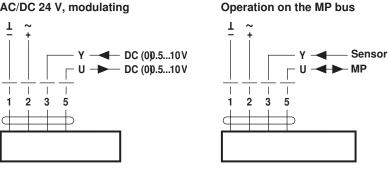

| Ac | ces | SO | rie | S |
|----|-----|----|-----|---|
| 70 | 000 | 50 | 110 | 9 |

| | Description | Туре |
|------------------------|---|-------|
| Electrical accessories | Auxiliary switch add-on, 2 x SPDT | S2A-H |
| Service tools | Manual parameterizing device, for MF/MP/Modbus/LonWorks actuators ZTH-GEN | |
| | and VAV-Control | |
| | Belimo PC-Tool, software for adjustments and diagnostics | MFT-P |

| Notes | Connection via safety isolating transformer. | |
|-------|---|--|
| | Parallel connection of other actuators possible. | |
| | Direction of stroke switch factory setting: Actuator spindle retracted. | |

Wiring diagrams

AC/DC 24 V, modulating

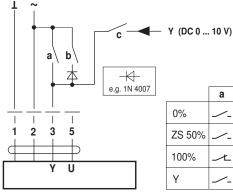

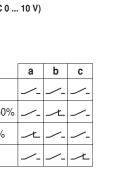

Functions

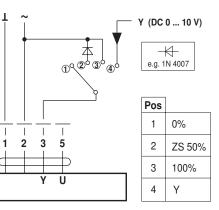

Functions with basic values

Override control with AC 24 V with relay contacts

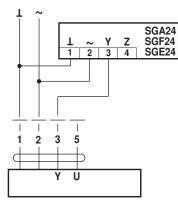

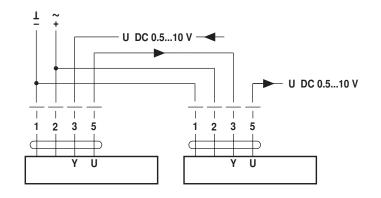

Remote control 0 ... 100%

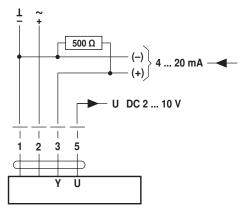

Follow-up control (position-dependent)

Functions

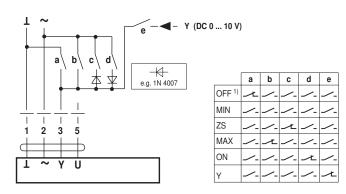

Control with 4 ... 20 mA via external resistor

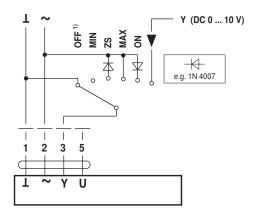

The 500 Ω resistor converts the 4 ... 20 mA current signal to a voltage signal DC 2 ... 10 V

Functions for actuators with specific parameters

Override control and limiting with AC 24 V with relay contacts

Override control and limiting with AC 24 V with rotary switch

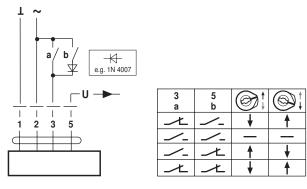

1) Caution: This function is guaranteed only if the start point of the operating range is defined as min. 0.6V.

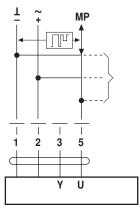

Functions

AC 24 V; 3-point

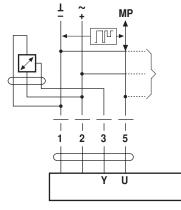

Functions when operated on MP bus

Connection on the MP bus

Connection of active sensors

Supply AC/DC 24 A Output signal DC 0 ... 10 V (max. DC 0 ... 32 V) Resolution 30 mV

Supply and communication

in one and the same 3-wire

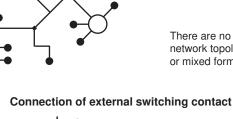

• no shielding or twisting

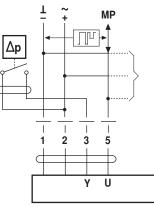

• no terminating resister

cable

required

required

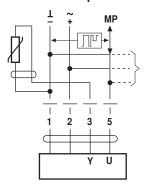

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted).

 Switching current 16 mA @ 24 V

 Start point of the operating range must be parameterised on the MP actuator as ≥ 0.6 V

Connection of passive sensors

| Ni1000 | –28 +98°C | 850 1600 Ω ²⁾ |
|--------|---------------------------|---------------------------|
| PT1000 | –35 +155°C | 850 1600 Ω ²⁾ |
| NTC | -10 +160 °C ¹⁾ | 200 Ω 50 kΩ ²⁾ |

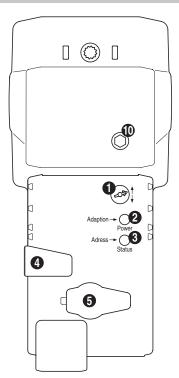

1) Depending on the type 2) Resolution 1 Ohm

Power topology

Globe valve actuator, communicative, modulating, AC/ DC 24 V, 1000 N, actuating time 35 s / 20 mm

Indicators and operating elements

(1) Direction of stroke switch
Switching: Direction of stroke changes
(2) Push-button and LED display green
Off: No power supply or malfunction
Illuminated in green: In operation
Press button: Triggers stroke adaption, followed by standard mode

(3) Push-button and LED display yellow Off: Standard mode

Flickering: MP communication active Illuminated: Adaption procedure active Blinking: Request for addressing from MP master Press button: Confirmation of addressing

(4) Gear disengagement button

Press button: Gear disengages, motor stops, manual override possible Release button: Gear engages, standard mode

(5) Service plug For connecting the parameterisation and service tools

(10) Manual override Clockwise: Actuator spindle extends Counterclockwise: Actuator spindle retracts

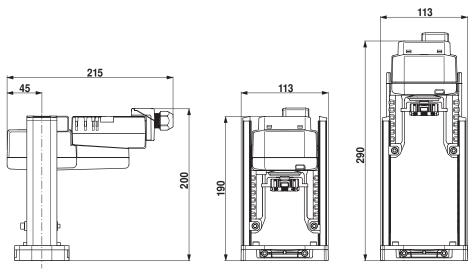

LED displays (2, green) and (3, yellow)

green: Off; yellow: Illuminated;

Check the supply connections. The phases may have been switched.
